Applicants' Response and Amendment filed November 14, 2006 is acknowledged. Applicants have elected the compound (-)-cis-6-phenyl-5-[4-(2-pyrrolidin-1-yl)-ethoxy]-phenyl]-5,6,7,8-tetrahydro-naphthalen-2-ol in response to a species election requirement.

Claims 1-22 have been canceled. New claims 23-26 are presented and represent all of the claims under consideration.

Rejections and objections not reiterated from previous Office Actions are hereby withdrawn. The following rejections and objections are newly applied and constitute the complete set of issues now applied to the present claims.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The abstract of the disclosure is objected to because it is not directed to the present, claimed subject matter. Correction is required. See MPEP § 608.01(b).

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 23-26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter that was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors at the time the application was filed, had possession of the claimed invention. This is a Written Description rejection.

The instant claims recite methods of inhibiting inflammatory bowel disease in a mammal comprising administering a compound of instant formula I of claim 23, or the formula of claim 24, of which the compound (-)-cis-6-phenyl-5-[4-(2-pyrrolidin-1-yl)-ethoxy]-phenyl]-5,6,7,8-tetrahydro-naphthalen-2-ol is the elected species.

MPEP § 2163 states "An Applicant shows possession of the claimed invention by describing the claimed invention with all of its limitations using such descriptive means as words, structures, figures, diagrams and formulas that fully set forth the claimed invention... one must define a compound by 'whatever characteristics sufficiently distinguish it'. A lack of adequate written description issue also arises if the knowledge and level of skill in the art would not permit one skilled in the art to immediately envisage the product claimed from the disclosed process."

Applicants have not described any therapeutic regimens in which any compound of the present invention is administered to inhibit inflammatory bowel disease.

While Applicants have prepared several compounds of the instant formulas and describe methods for their application in treating wound healing, a reduction in thickening in arterial walls in a pulmonary disease model or obsessive-compulsive disorders, *inter alia*, on pages 38-53 of the specification, there is no showing drawn to inhibiting inflammatory bowel disease. The claims are not commensurate in scope with the disclosure. Further, Applicants have provided no guidance or direction as to the means by which one skilled in the gastrointestinal art would select a specific compound for a specific inflammatory bowel pathology.

The disclosure does not provide an adequate written description for the claimed genus of compounds in methods of inhibiting inflammatory bowel disease that would indicate Applicants were actually in possession of the claimed methods at the time the invention was made.

No claim is allowed.

Applicants' Amendment necessitated the new ground of rejection presented in this Office Action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this Final Action is set to expire **THREE MONTHS** from the mailing date of this Action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this Final Action and the Advisory Action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the Advisory Action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the Advisory Action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this Final Action.
